Response to Questions for RFB SQF 16: Request for Engineering Services.

1. Is there a page limit for the proposal? If there is a limited budget for this work, we would normally anticipate a page limit (say 10-15 pages).

A: There is no page limit

2. Is there a budget or range of budget for the Scope of Work?

A: The budget does not have a threshold, however, there is limited funding. Competitive bids are encouraged.

3. Is there an overall construction budget for the project?

A: Same as A 2.

4. Approximately how many miles of road (or number of stormwater crossings) will be addressed in the 1611-acre project?

20S08B - 0.65 mi

20S46 - 2.23 mi

5. Has there been any Geotech work done in the area? The Scope of Work mentions "slide and slump repair." We are thinking some Geotechnical Evaluation will be required to complete the design.

A: No information available on prior Geotech at present. State your assumptions given this lack of data.

6. Are there any specific permit limitations?

A: None at present. Upon award, further details on permitting will be reviewed.
